Anna Keith, National Director of Business Development for Therap, a web-based service organization that provides an integrated solution for documentation and communication needs of agencies providing support to people with disabilities, especially developmental disabilities in the US and Canada, made a special visit to Mesa Developmental Services, 950 Grand Avenue, on January 27th to personally announce to the nonprofit organization that they had been selected to be the very first recipient of a new award - **Gold Star Standard of Therap Excellence**. This recognition is for MDS' efforts to successfully implement various Therap modules and become paperless in less than a year.

Therap offers an easy and efficient alternative to the immense amount of paper work that is done manually by care providers. The benefits of Therap are improved care, reduction in record keeping costs, better communication and improvement in risk management and compliance. MDS is featured in an article on Therap's website, [www.therapservices.net/anna/](http://www.therapservices.net/anna/)

MDS provides support services to approximately 650 children and adults in Mesa County with developmental disabilities from 15 group homes, five program sites, host homes and individual residential sites throughout the community.
